ESSOAZINA ANGE RAIYANE

AI / Machine Learning Engineer — Internship Candidate

angeraiyane@gmail.com | +212 682 289 556 | Beni Mellal, Morocco | github.com/Angeraiyane

PROFILE

Master's student in AI & Data Computing (FST Beni Mellal) with hands-on experience in machine learning, deep learning, and real-time data pipelines. Delivered a fraud detection system rated 18/20 using Isolation Forest, SVM, and Random Forest. Currently working as an AI Community Agent and Data Analyst at Transsion (Kilimax), building computer vision and NLP projects in PyTorch. English C2. Seeking a Data & AI internship at Capgemini to contribute to production-grade systems.

EDUCATION

M.Sc. AI & Data Computing — FST Beni Mellal, Morocco *2025 – 2027*

Coursework: Deep Learning, Big Data Architectures, Distributed Computing, Statistical ML

B.Sc. Computer Science — FST Beni Mellal, Morocco *2022 – 2025*

Final-year project: ML fraud detection system — graded 18/20, top of cohort

Baccalauréat — Sciences (Top of Region) — LYSMAS, Togo *2022*

Ranked #1 in the region — consistent academic excellence from the start

EXPERIENCE

AI Community Agent & Data Analyst — Kilimax (Transsion) *July 2026 – Present*

Support AI-driven community and product initiatives for Transsion's Kilimax ecosystem
Analyze user and product data to extract insights and support data-driven decision-making
Collaborate with cross-functional teams to monitor AI feature performance and user engagement
Prepare reports and dashboards translating raw data into actionable business insights

Data Science Intern — PFE (Final Year Project) — FST Beni Mellal *June 2025*

Built an end-to-end ML pipeline for financial fraud detection on imbalanced tabular data
Applied Isolation Forest, SVM, and Random Forest; compared models via precision, recall, F1-score
Feature engineering, SMOTE oversampling, cross-validation; achieved best F1-score of 0.93
Graded 18/20 — highest score in the cohort

PROJECTS

Real-Time Flight Data Pipeline — SkyNet-Federated — Personal *2026*

Ingested live flight data via Kafka; processed with Hadoop for distributed ML training
Federated learning architecture: each Kafka consumer trains locally, models aggregated globally
Stack: Python · Kafka · Hadoop · Scikit-learn

Emotion Recognition for Autistic Children — Academic / Personal *2026*

CNN (PyTorch) detecting 6 facial expressions in real time; $\sim$84% validation accuracy
IoT integration: Raspberry Pi triggers parent alert when distress detected for $>$3 seconds
Stack: PyTorch · OpenCV · Python · Raspberry Pi

Medical Chatbot — LLM Fine-Tuning — Personal / NLP *2026*

Fine-tuned a lightweight LLM on curated medical Q&A datasets for symptom triage
Conversational interface built with FastAPI; HuggingFace Transformers pipeline
Stack: Python · PyTorch · HuggingFace · FastAPI

TECHNICAL SKILLS

ML / AI	Scikit-learn · PyTorch · TensorFlow Lite · HuggingFace Transformers · LLM Fine-tuning
ML Methods	Isolation Forest · SVM · Random Forest · CNN · ANN · Autoencoders · Federated Learning
Big Data	Apache Kafka · Hadoop · MongoDB · Neo4j · OrientDB · MariaDB
Languages	Python (primary) · Java · JavaScript · SQL
Full-Stack	FastAPI · Spring Boot · Next.js · Tailwind CSS
Tools	Git · Docker (basic) · Linux · AWS (in progress) · Jupyter
IoT	Raspberry Pi · Sensor integration · Edge inference (TFLite)

ACHIEVEMENTS & LANGUAGES

Achievements

- PFE Fraud Detection — 18/20, top of cohort
- Top of region, national baccalauréat
- Nazahathon hackathon — blockchain transparency project

Languages

- French — Native
- English — C2 Proficient (professional working level)
- Italian — A2 Beginner
